Thanks Cinna – we need to discuss further down here before any changes. The County may not want to do this.

Including additional entities could be done. It would be at the discretion/approval of CDPHE. We would have to amend the CDPHE agreement to add the work and any additional funds. CDPHE would have to issue a new/separate Purchase Order to that agency.

Cinna,

A question from the county came up this weekend: Does the CA (or can the CA include) San Juan county or any of the other affected communities / tribes?

There is no specific form that needs to be completed. Under a cooperative agreement all sub-agreements have to comply with the same contract provisions under the original awarded cooperative agreement, 35.6610. I am including OGC on this one.

I'm not sure but am looking into it.

Subject: Contractor Request for GKM Sampling Locations/Analytes

Cinna and Joe,

Colorado ICP were contacted by Wright Water Resources (?) who is doing work for the LaPlata County folks. They requested the sampling locations and analytes that EPA is using, presumably in LaPlata. We directed Colorado ICP that, until LaPlata County is in a Cooperative Agreement with EPA, we would not provide the locations or analytes to WWR. This is likely to be brought up at the regular coordination meetings that Patti and Mike are having with LaPlata County at 4 pm today.

My question is this: Is there any kind of confidentiality requirement for LaPlata County in a Cooperative Agreement that would follow through to their contractor(s)? If not, can we include one so that we can provide the locations/analytes that they will eventually be wanting? Please let me know at your earliest convenience. Thank you, lw
